EDUCATION

University of California, Irvine

Paul Merage School of Business |
Irvine, CA

Master of Science in Business Analytics – Emphasis in Data Science

Machine Learning, Statistical Modeling, Python, SQL, R, Predictive Analytics

Graduation: Jun 2026

Cumulative GPA: 3.9

University of California, Irvine

Irvine, CA

Bachelor of Business Economics

Quantitative Economics, Econometrics, Statistics

Graduation: Jun 2025

Cumulative GPA: 3.7

SKILLS AND INTERESTS

- Python · SQL · R · Excel
- Microsoft Office
- Machine Learning · Predictive Modeling
- Time Series Forecasting
- Data Visualization
- TrackMan · Synergy Sports
- 643 Baseball Charts

EXPERIENCE

Baltimore Orioles (Independent Analytics Project) | Remote Jul 2026 - Present

Independent Lead Analyst - Collaborating with Assistant GM Sig Mejdal

- Work directly with Baltimore Orioles Assistant General Manager Sig Mejdal to test and improve methods for evaluating NCAA Division I pitchers, comparing pitch-clustering approaches, refining pitch classification criteria, and evaluating model performance based on results and feedback.
- Built a repeatable data pipeline for 2M+ TrackMan pitches using Python, SQL, and R, integrating data cleaning, validation, feature engineering, rolling velocity metrics, and pitch-level run values to create model-ready datasets for pitcher analysis.

Aberdeen IronBirds (MLB Draft League) | Aberdeen, MD Jun 2026 - Sep 2026

Data Coordinator

- Supported daily game preparation by producing customized scouting reports and leading hitter and pitcher pre-game meetings covering matchups, opponent tendencies, pitch characteristics, and in-game strategies.
- Aided player development by analyzing TrackMan and 643 data, identifying relevant performance trends, and communicating findings to coaching staff and players.

Farmer Boys | Riverside, CA Jan 2026 - Jun 2026

Student Data Analyst

- Built and validated an ensemble forecasting system across 6 candidate models and 40 rolling backtests, using OLS decomposition to separate underlying business performance from seasonal and calendar effects.
- Deployed forecasting outputs through a Streamlit application that enabled non-technical stakeholders to generate and interpret actionable sales and transaction forecasts.

UCI Baseball | Irvine, CA Oct 2024 - May 2026

Student Analytics Manager

- Built Stuff+ and Location+ models, a pitch-clustering system, and an interactive dashboard using NCAA Division I TrackMan data to support pitcher evaluation and player development.
- Developed analytical tools, including a batted-ball clustering model for defensive positioning and a web application that visualizes pitch movement profiles, detects changes in pitcher metrics over time, and generates post-game analysis.
